

HOPE

Partnership in designing little miracles

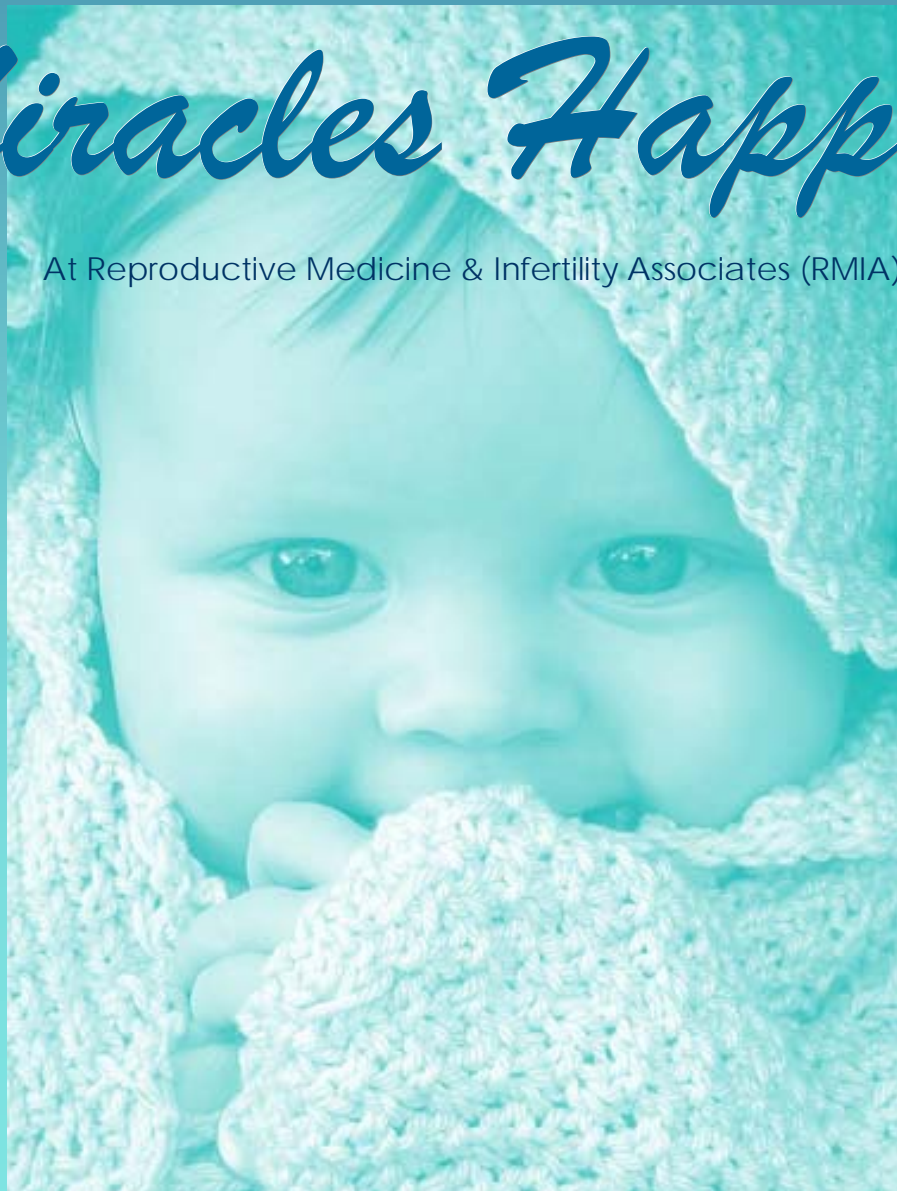

With its well known Fertility Cost Warranty Program (FCWP), RMIA was one of the first centers to share risk with its patients. RMIA has accumulated enough experience to now offer its new **HOPE** program.

Most women under 35 will qualify for this all-inclusive **100% refundable** program of up to 3 treatment cycles of IVF, after which a cumulative live birth rate of 80% is expected.

In other words, if **success**, defined as "A Normal Live Birth," is not achieved after 3 cycles, the total investment of \$25,000 will be fully refunded.

Miracles Happen
